MANUFACTURER'S CERTIFICATE

(This document is not required by an import regulation, it is voluntarily issued)

Siegertsbrunn/Germany

confirm that the moulded INKA particle board pallets used in this consignment by our client

company

address

city, country

are manufactured, in the same way as particle board. After drying the wood particles to a moisture content of only 4 % , follows a moulding process using pressure, heat and a binding agent. These processes can not be survived by any plant pests.

Therefore these pallets are **highly processed by heat and pressure treatment according to Notice no. 11 (2005) from AQSIQ, Article 1, paragraph 2** (Exceptions of the rule). So therefore these pallets don't have to get a treatment and don't have to get an IPPC-marking

We confirm that these moulded particle board pallets are of heat processed wood, so they are considered as sufficiently processed and totally free from any plant pests according to IPPC-ISPM15!
